(54) COMMUNICATION METHOD AND COMMUNICATION DEVICE

(57)Abstract:

PROBLEM TO BE SOLVED: To perform unitary management of the storage of addresses of a device that transmits and receives electronic mail and the storage of telephone numbers of a communication device by transferring and storing data of telephone numbers, etc., among personal data which are managed by a communication controller side of electronic mail to/in a communication terminal.

SOLUTION: An address of electronic mail, data of a telephone number that corresponds to it, etc., are stored in a television receiver 1. The stored data is shown on the receiver 1 through a prescribed operation of a controller 5. When you want to transmit electronic mail, a specific personal address is selected among what is shown and a prescribed operation is performed by an operation of the controller 5, etc. That is, when it is decided that there is no input of correction data nor new data and when a transfer mode is set to a PHS terminal 3, data of updated address book is transferred and stored to the terminal 3 that is connected to a charging base 2. Call out processing is done by using the data of telephone numbers which are stored in the terminal 3.

LEGAL STATUS

[Date of request for examination] 18.04.2001
[Date of sending the examiner's decision of rejection]
[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration] abandonment
[Date of final disposal for application] 20.12.2004
[Patent number]
[Date of registration]
[Number of appeal against examiner's decision of rejection]
[Date of requesting appeal against examiner's decision of rejection]
[Date of extinction of right]
